Notes:

This table was generated by an Access database of federal domestic assistance programs that rely *in whole or in part* on federal statistics to determine:

- the formula by which funds are allocated geographically and/or
- the eligibility of the applicant, the recipient, or the beneficiary to receive the assistance.

The table lists federal assistance programs that rely *in whole or in part* on: data collected through the decennial census of population; Census Bureau estimates (particularly annual population estimates and the American Community Survey) derived from decennial census data; and data produced by other federal agencies that rely on Census Bureau statistics based on the decennial census.

Examples of decennial census-derived statistics produced by other federal agencies include the Bureau of Economic Analysis' per capita income (which uses Census Bureau population estimates as the denominator and "long form"/ACS journey-to-work data to help calculate the numerator) and the Department of Housing and Urban Development's fair market rents, which are based on the Census Bureau's median household income figures taken from the ACS.

Caution: For each program listed in the table, the dollar amount is the **total** expenditure as provided by the CFFR. No attempt has been made to determine the portion of the total that is allocated on the basis of decennial census data. Hence, figures from the table should be cited with care and clarity.

Programs that rely on federal statistics were identified through a review of the Catalog of Federal Domestic Assistance (<http://www.cfda.gov>), maintained by the General Services Administration. Information regarding each program's reliance on federal statistics was gathered from the Catalog (CFDA), federal law and regulation, and, as necessary, a telephone call to grant program personnel. The allocation of grant funds by geography was drawn from the Consolidated Federal Funds Report (CFFR) database (<http://www.census.gov/govs/www/cffr.html>), maintained by the Census Bureau. FY2008 is the latest year for which CFFR data are available.

At times, program funds are deobligated from a given geography if, for example, actual program costs were less than were anticipated. If a program had a net deobligation in FY2008, expenditures for that program appear as negative. Negative numbers appear in parentheses.

The table's per capita figure is determined by dividing the sum of total program allocations by the Census Bureau's 2008 population estimate for the geographic area.

The findings in the table are preliminary and subject to revision.
